VOLUME 45 NO. 1

Authorized as second class mail,
Post Office Department, Ottawa.

GLEICHEN, ALBERTA, WEDNESDAY

MARCH 19, 1952

SUBSCRIPTION \$2.00 PER YEAR

Nidgets Lose Championship Protest Last Game

Before a crowd of approximately 400 hundred spectators at Vegreville, and Gleichen played their first of a two game series most goals to declare the winner, on local live last week, Vegreville won by a score of 4-2.

In the first the visitors plainly had the best of it. The locals put up a solid defence and not more than three or four times did Wilson really have to extend himself to save the net. Gleichen had about as many shots on Vegreville. Two goals were made by the locals. One by Larry Gordon and the other by Larry Plante. The visitors scored twice.

Gleichen had most of the play in the second and third but were unable to score. Vegreville made a couple of counters by some smart work.

Accompanied by about 20 fans Gleichen went to Vegreville Saturday. Vegreville won the game by a score of 3-1. Jim Brown for Gleichen made the first goal in 30 seconds after the game started. Denny Bass also counted for the locals. In the second Doug Bassant made the first goal for Gleichen and Vegreville scored twice. Gleichen was now down only one goal for the total of two goals. In the third Gleichen lost their heart and Vegreville counted six goals. Gleichen got 14 penalties and several times had two men in the penalty box at once. Vegreville got only 3 penalties all evening. The local fans who saw the game say the Vegreville referee was a wonder.

Gleichen lineup: Doug Wilson; Doug Bassant; Bernard Moss; Denny Bassant; Edward Platte; James Brown; Armand Corbille; Larry Gordon; Harvey Sauer; Tom O'Connell; Edgy Jerry; Michael Robbitt; Currier; Francis Bear Chief; Francis Tailor; Colin Grant; Hubert Low Horn.

Buster Scott manager and coach. Gleichen is protesting the game. Vegreville has an electric clock for hockey. It went on the blink. Dick Haskayne was one of the time keepers and had a stop watch with the electric clock out of commission the time keepers went by the stop watch. With one minute to go in the second, the score 3-2 in Gleichen's favor, Dick started out calling the seconds 60, 55, 50. As he called 50 the time keepers at the Vegreville time keeper pushed the button that rang the bell signifying the end of the period. At that moment Jimmy Brown had got through the Vegreville team the goalie was out of position. He probably would have scored. The Vegreville time keeper had made bets that his team would win. The bets were made with Gleichen men. There you have the reason for the protest.

The above and the refereeing on the part of the Vegreville referee caused to have taken the heart out of the local players and they went to pieces in the first.

THERE ARE SOME LIBERTIES

Enslavement, like old age, creeps. Most men in our life find this they're as good as ever. Then something reminds them. It may be a battle with a four-year-old grand son. Or a game of catch. Or chasing somebody.

A certain loss of liberty is even more subtle. A bright writer recently said, in a nodding moment, that no one can see a loss of single liberty without being determined who is to live in Ottawa can think of a dozen losses. People who seldom get away from the capital may think it is good in a good world.

First loss of liberty, and one of the greatest, grows out of the personal income tax in Canada prior to 1917, what a man earned was his own. He needed to account to no one for how he spent his money. His front kept his office in his hat. Honest gains were gains.

Now a person is accountable to a government for every cent he takes in. The government can examine every detail of his personal affairs, can tell him how to keep his books and arbitrarily determine what is an expense and what is a business man's luxury—say, giving a secretary a new coat.

The greatest loss of liberty in more modern times is the right of a Canadian to liquidate his assets and get his country free if it wishes. Canadians are not free to leave it. Canadians don't want to get out but would be

less likely to get out if they could.

Next is the list of liberties that have vanished are the shackles that Western grain growers put on themselves when they permitted their government to decree that no wheat could be sold except through a government agency at prices fixed by governments. In such circumstances it is hardly more than a fiction that the farmer owns the land on which he grows the wheat that the bureaucrats control absolutely.

Still another great loss of liberty is the denial to owners of residential property the right to dispose of it as they wish. Men wise in demography decided that rents had to be fixed to suit the tenants, not the market. The result has been a withdrawal from landlordism and an apparent shortage of housing. The housing problem, over which every petty politician sheds crocodile tears, is an ancient phase of injustice.

Learn remarks in his hallicination that he cannot be charged as a colour because he is the king. Prior to 1930, a Canadian dollar was practically worthless with gold. Today a benign government can, and does, issue as much paper as it has the mind to, thus robbing every saver in the nation a part of his substance. Moreover, it is now a crime for any citizen to buy, own or trade gold.

Those who work for wages have lost much of their freedom. Under the law a man must pay union dues or not work. The union decides that there is no legal redress when a man is evicted from a union and thereby loses his right to play hard. Under the iniquitous Rand formula it is a compulsion for a worker to be compelled to pay tribute to a union for which he may have neither use or love.

Among the freedoms left is the right to publish and the right to complain.

FROM THE FILES OF THE CALL TWENTY YEARS AGO

Art Bremner and his old time orchestra played over CKLC Saturday night. It sounded good to hear Art playing Joe Gutman put through a call for "Red River Valley". Art also played "How Dry I Am". Art's on Jack gave a mouth organ solo.

Leslie Hong of Cluny has returned from a trip to China.

Hogan, Al Wilson and Birdsen will be a very glad to demonstrate to anyone who is to eat limber cheese by the pound. Jim Kee says that the next time these guys eat this cheese in his restaurant he will seat them by an open window with an electric fan going full blast so that passers by get a whiff.

Bob Brown returned home Saturday night after spending the winter playing hockey for Seattle.

The tennis club has elected the following officers for this year: A. F. McCallum, president; B. Cardinal, vice-president; M. Yates, secretary; Misses Miljour and K. Lewis executives.

Frank Sharp, the famous saxophone player is in town. He is a hale fellow well met and is the best sax player Gleichen ever had for dances.

This town has never really taken up hockey in a serious way. One paper records that after their hockey team a pair of skates, a bell and a rest of false teeth were found back of the referee's office. So far as is known the rest of the referee's office. And in a game in a small town the referee had his leg broken when he tried to stop a fight as the playing teams and supporters all tangled. They phoned the referee reserves twenty miles away and when they arrived the battle was still raging.

Mrs. J. Boyd

Mrs. John Boyd a former resident of Gleichen died in Calgary last week. Mrs. Boyd was born in Biggar, Saskatchewan, Scotland and came to Gleichen in 1928 where she resided until 1940 when she moved to Calgary where she has resided since that time. For some years she had not enjoyed very good health and recently underwent an operation.

Surviving are her husband, two sons Kenneth and John of Calgary, two daughters, Mrs. R. E. (Agnes) Thomas of Evanston, Ill., and Moya of Calgary; and three brothers. The funeral took place last Thursday afternoon being held in Queen's Park cemetery.

Dr. Olive Fisher Will Speak to H.S.A.

Since March is the month of National Educational Week, Gleichen Home and School Association has invited, one of our leading educators, Dr. Olive Fisher, who will speak on "The Development of a Young Child."

The meeting will be at the school on Monday, March 24th, at the regular time.

Legion W.A. Hold Meeting

There was an attendance of 35 at a regular meeting of the Women's Auxiliary to the Canadian Legion Thursday evening in the Gleichen Legion Hall. The meeting was conducted by the president, Mrs. H. Bogie and many details of business were dealt with.

Mrs. M. Wallace, Mrs. Edna MacArthur, Mrs. W. Winnifred, Towars Mrs. W. Rouchie and Mrs. Mary Campbell were initiated into the Auxiliary branch as members. Mrs. Hamilton was appointed convener of the Cancer drive. A donation of \$10 was voted to be sent to Mildred Gordon.

Two councillors, Mrs. Towars and Mrs. Haskayne were elected to fill the places of two members who signed to take other offices. Mrs. Parquharson accepted the appointment as Standard Bearer.

Mrs. W. Varnell, Miss Baby Varnell and Mrs. B. Anderson, who are leaving shortly to reside elsewhere were presented with the usual gift of a cup and saucer. These members of the Auxiliary will be greatly missed by the organization and all are sorry to see them go but wish them every success in their new homes.

April 12th is the fifth anniversary of the contest and this was tabled until next meeting.

The contest was won by Mrs. R. Dell. Refreshments and a pleasant evening followed.

United Church W.A.

The United Church Women's Association met at the home of Mrs. P. Warner Wednesday afternoon, March 12th. Meeting was opened in usual manner by the president, Mrs. K. W. Bolinger. Seventeen members answered the roll call with a Bible verse starting with the letter "M" and the devotionals was given by Mrs. R. A. Wilson.

Mrs. Hunter and Mrs. Kilcup were appointed on a committee to purchase blinds for the church windows. After the meeting was adjourned refreshments were served. Following this the afternoon was spent purchasing many cooking from a bake sale table. This proved quite a success.

Widows and children inheriting the savings of Canadian husbands have become a major group of the shareholders who own Canadian industry. In many Canadian corporations the individual women shareholders outnumber men by a considerable margin.

EXPERIMENTAL FARM NOTES.

A high degree of production has been established on many irrigation farms through the use of legume rotations, commercial fertilizers, and the application of barnyard or feedlot manure. However, the records covering all of the irrigation projects in Alberta indicate that a great many irrigation farmers are operating largely on a dry land farming basis.

In round figures, these figures show that 40 percent of the irrigable cropland of the large irrigation projects in Alberta is devoted to wheat, eight percent to oats, six percent to barley, 10 percent to grass hay and 10 percent to alfalfa. The high proportion of grains, and the limited acreage devoted to soil improving crops, are reflected in the low average yields reported. The 1949 results, the last year for which records have been assembled, show that wheat averaged 27 bushels, oats 40 bushels, and barley 35 bushels per acre. These yields are much too low for irrigation farming, particularly since the crops, along with the area, summer-fallowed each year.

make up about 70 percent of the total tillable crop area.

Changes in cropping practices on these projects do not have to depend entirely on the development of markets for more specialized crops. The development of more specialized crops that can be grown and marketed. One of the first needs in stepping up yields per acre on our irrigated lands is to increase greatly

the proportion of soil improvement crops, including legumes and grasses. This involves either livestock feeding where the manure is returned to the land, or green manure where green growth is ploughed under. It also involves the use of phosphate fertilizer to obtain maximum yields and quality of soil improving crops, and the cash crops that follow. Rotation "U" at the Lethbridge

Experimental Station provides a classic example of yields obtainable under irrigation through the use of soil improving crops, barnyard manure, and phosphate fertilizer. After 10 years of continuous cropping wheat yields now average 55 bushels per acre, oats 104 bushels, barley 85 bushels. Rotation "U" it should be pointed out, consists of 50 percent alfalfa.

NEW CHRYSLER EXPERIMENTAL SPORTS-TYPE MODEL

Here is a view of the new Chrysler K-310 put on display recently by Chrysler Corporation. This experimental car has a wheelbase of 129 1/2 inches, an overall length of 220 1/2 inches and an overall height of 50 inches. It seats six persons comfortably.

ably with abundant headroom. It is designed for either the standard Chrysler FirePower 160-horsepower engine or for the new K-310 engine, an evolution of the FirePower that develops 140-horsepower on commercial premium fuel.

Guardians of Peace...

The infantry machine gunners

The Canadian Infantry Soldier is a vital part of our expanding defence forces. In Korea he has built a wonderful reputation for his courage and ability. Wherever he goes, the Canadian Soldier has a way of winning friends, of impressing both friend and foe with his outstanding training and soldierly qualities.

The Infantry Machine Gunners are an integral part of the Canadian infantry regiments. With their heavy and accurate fire power, the Infantry Machine Gunners have time and again in Korea proved how extremely important they are in attack and defence. Play your part in Canada's most important business today, defence. You are eligible if you are: 17 to 40 years of age, (tradesmen to 45), physically fit and ready to serve anywhere.

God Save The Queen

CANADIANS DID NOT KNOW, when they welcomed Princess Elizabeth and her husband, the Duke of Edinburgh to this country a few months ago that she would so soon become the Queen. Sorrow at the tragic and untimely death of her father, King George VI, has dimmed the first weeks of her reign but people everywhere already know that although she is very young to assume the great responsibilities of her high office, the Queen is carrying on the highest traditions of a monarchy which is unique in the world today. Much has been spoken and written of that monarchy in the past weeks and people within the Commonwealth and Empire, and many in other lands, have had a feeling of having witnessed historic and deeply significant events.

Is Well Known To Her People

It is over fifty years since a Queen has occupied the throne and it is nearly four hundred years since the ascension of Queen Elizabeth I, whose reign, with that of Queen Victoria, have come down in history as great periods in the story of the British people. Queen Elizabeth I is well known to her people and there is a feeling of well being among the people and the hope that her reign, like those of the two last Queens, may add another bright chapter to the history of their country. She has come to the throne at a time when the future does not appear hopeful, and there are problems of great magnitude both at home and abroad. Her father set an example of courage and fortitude which helped the people to withstand the war and the troubled times which have followed.

Share In Hope For The Future

The steadfastness of the young Queen and her obvious intention to carry on the tradition of the monarchy in the manner of her father, is already apparent. To the many Canadians who saw her and her husband not long ago, she will never be a shadowy figure across the sea, but rather, a charming and gracious young woman interested in the people and the country which she was seeing for the first time. In the natural course of events her reign will continue through the lifetime of most Canadians who are now adult. The national anthem in their time will always be "God Save the Queen", and there will be hope sincerely that her reign will indeed be happy and glorious and that it may mark the beginning of better times for her people in Britain.

Sudbury, Ont., Gets 1953 Bonspl

WINNIPEG: The Canadian curling championship will be held at Sudbury, Ont., Chief Justice "Tate" Campbell of Charlottetown announced.

It will be the first time the annual classic has been held in Northern Ontario.

The chief justice said Thomas H. Rennie of Toronto has been named honorary chairman. Campbell, who is retiring, is curling champion. He will be succeeded as chairman by Senator John T. Haig of Winnipeg.

Ross Hartstone of Hamilton was named a new member of the board.

Deaths From T.B. In Manitoba Decreasing

WINNIPEG: Deaths from tuberculosis in Manitoba decreased to an all-time low of 21.6 per 100,000 in 1951. Dr. E. L. Ross, medical director of the sanatorium board of Manitoba, said.

"Although white population deaths were six more than the previous year there were 22 fewer Indian deaths during the year, thus reducing the combined figure to 16 fewer deaths than in 1950," he said.

During 1951, 318,099 free chest X-rays were taken—41 per cent of the population of Manitoba.

Extensive educational, vocational and rehabilitation services were provided for sanatorium patients.

Incidence of new cases amongst Indians decreased from 239 in 1950 to 189 in 1951; amongst whites, cases dropped from 363 to 533.

QUIT SHAVING

VERNON, B.C.—Officials at this grain-growing centre called on citizens to quit shaving starting April 1 because a diamond jubilee celebration scheduled to start then "wouldn't be worth the name without beards".

Benjamin Franklin introduced the beard into the United States.

More Comfort Wearing FALSE TEETH

Here is a pleasant way to improve those false discomfort. FARTHEIMER, an advanced powder, makes you smile as if your teeth were perfect. It's the only one that makes you smile. It's the only one that makes you smile. It's the only one that makes you smile.

Funny and Otherwise

"Did your grandfather live to a green old age?"

"Should say no! He was swindled three times after he was seventy."

Professor—Why don't you answer me?

Freeman—I did, Professor. I shook my head to him sincerely.

Professor—But you don't expect me to hear it rattle away up after you, yes?

After giving an army private a dressing-down for being late in returning with supplies, the sergeant demanded, "Well, I hear how it happened, Miller."

"Well, I picked up a chaplain along the road," explained the offender, "and from then on the miles counted under a worn I said."

Women's Tears: First successful fluid drive.

Television: A device that permits people who haven't anything to do to watch people who can't do anything.

"Do you remember that night I kissed you?" asked the young man about town.

"Oh, yes," replied the chorus girl.

"And you remember my saying that you would be mine, all mine, for ever and a day?"

"I was afraid you would."

The sorcery girl had just received an engagement ring and wore it down to breakfast next morning. To her exasperation no one even noticed the ring.

Finally, after fuming and squirming through the meal, a full call came in the conversation and she exclaimed, "My, it's getting hot in here. I think I'll take off my ring."

"I've come to mend the tap you wrote about," said the plumber to the woman who answered the door.

"You're really send for you."

"You're Mrs. Green?"

"No, Mrs. Green left here two months ago—before we were married."

The plumber turned to his boy.

"Would you believe it, BUB? Fanny sending for us to do a job and then moving?"

PRIZE HERDS SLAUGHTERED TO CHECK DREADED DISEASE.—Prize herds of cattle, among them the prize of many a farm boy, have been slaughtered in the Redoubt area as the federal government moved to wipe out all traces of the dreaded foot-and-mouth disease. Most of the cattle slaughtered showed no visible trace of the disease leaving cattlemen bewildered on the necessity of killing them. The U.S. government may ease its hastily declared embargo on Canadian livestock if the spread of the disease appears to be completely arrested.

Dreaded Virus

Foot- and- Mouth Disease Feared By World's Cattlemen

Spreads Like Wildfire and Can Be Dangerous to the Whole National Economy

OTTAWA—Foot-and-mouth disease is feared by cattlemen throughout the world. It is as dangerous to livestock as smallpox and the bubonic plague is to humans. It spreads like wildfire. The only way to halt it is to slaughter infected animals and bury the carcasses.

Transmitted by a tissue-destroying virus, the scourge in recent years has struck at Mexico's thriving cattle industry and almost destroyed it. It has crippled livestock production in continental Europe. It has threatened to injure Britain's economic backbone.

Just where this animal plague originated is unknown. Some scientists believe it has a 2,000-year European history traced back to Biblical days. But actual documentation goes back only about 400 years.

Foot-and-mouth disease in European agriculture has become so widespread that some countries have given up trying to eradicate it. Young animals infected by it sometimes die. Older ones become so lame and useless that they become uneconomical to maintain.

But it doesn't affect the human. Humans have been known to eat infected meat, properly cooked. The cooking apparently kills the bacterial infection.

The virus, transmitted in many ways by animals, by humans on their boots and clothes, and even by flocks of migrating birds and hay and straw, hits exposed animal tissue.

It causes blisters on the mouth, tongue, and even some parts of the animal hoof. It sometimes even gets into the stomach and circulates through the blood.

The animal goes off its feed. It becomes lame. It loses weight. Worst of all, the virus spreads.

When Four Children Need a TONIC

GIVE THEM HIGH ENERGY SCOTT'S EMULSION

Helps build stamina—helps maintain resistance in youngsters and adults.

Scott's is a high energy TONIC—with natural A & D vitamins in natural oil and added minerals.

Easy to take. Scott's is highly recommended by doctors.

No Danger Of Dreaded Disease From Chicks

REGINA.—Federal officials in charge of fighting the foot-and-mouth outbreak in cattle around Regina issued a statement saying that the shipment of baby chicks from approved hatcheries in Saskatchewan is not restricted.

The statement said "there is no danger of baby chicks from approved hatcheries carrying foot-and-mouth virus."

The statement was issued after quite a number of farmers reportedly cancelled orders for chicks, fearing spread of the disease to their premises, which prompted hatchery operators to contact federal health officials to obtain clarification of animal officials for an opinion.

DIETRIER OPERATING

DIETRIER, Sask. Farmers with large supplies of damp grain are feeling optimistic here these days as three large imported grain driers are in operation. The driers can handle 1,000 bushels per hour, each at a cost of 12 cents per bushel.

Many Rural Schools Close In Saskatchewan In Past Twelve Years

REGINA.—Schools have closed in almost 1,000 rural districts in Saskatchewan as a result of the decrease in the province's rural population since 1940.

This was disclosed in the Saskatchewan legislature by the annual report of the education department. The report said enrolments in these districts were so low that schools could not operate successfully and were therefore closed.

STOPS PAIN! ASPIRIN

NEURITIC-NEURALGIC

UNUSUAL OPPORTUNITY TO MAKE MONEY IN SPARE OR FREE TIME

Large international liquid fertilizer manufacturer requires men for direct selling from factory to farmer. Yes, here is your opportunity to make money! Previous selling experience unnecessary. You can take orders in your own district. Every grain farmer is a potential customer for our product—repeat business year after year. We are offering a special sales plan which enables men to enjoy steady earnings writing orders full or part time. No investment is required and you will be asked to buy merchandise. Send \$1.00 for your complete sales kit. This deposit will be refunded on your first order. Act now, send immediately to:

Town & District

Ed James, our popular druggist, left for Banff Sunday to spend a week holidaying. He loves to ski.

Mrs. F. Warner entertained with a tea in her home Monday afternoon in honor of her guest, Mrs. J. Robinson, a number of friends.

Mr. and Mrs. Lloyd Riddell and Mr. and Mrs. L. Boar and son Ricky of Calgary motored to Gleichen and spent Sunday at the home of Lloyd's parents, Mr. and Mrs. N. A. Riddell.

After the conclusion of the severe spell of cold weather the temperature rose considerably in Gleichen over the weekend. This was a great relief to everybody. Cattle are in very fair condition throughout this area. It is principally due to the fact that a considerable amount of feed has been fed during most of the winter. There has been no talk of spring operations and harvest the swathed grain lying in the fields.

Mrs. J. Robinson of Strathmore is a house guest at the home of Mr. and Mrs. F. Warner.

Red Cross Appeal Now Underway

In one of the largest single relief shipments undertaken by the Canadian Red Cross Society, approximately \$1,000,000 worth of flour will be shipped this month to northern Greece where fully substantiated reports confirm that unless relief food supplies are received soon, many thousands in northern Greece will starve during the coming months.

Following a number of conferences between the Federal Government and Red Cross, the Canadian Government announced that 500,000 bushels of No. 5 wheat were given to the Society to be milled into flour for this Greek famine relief.

Red Cross is supervising the milling, sacking, shipping and distribution of the flour by 13 milling companies in the west. The flour will be packed in good quality cotton bags bearing a large Red Cross and the name "Canada" in both English and modern Greek.

Bag companies in Western Canada are manufacturing the 200,315 one hundred pound bags for the shipment with the steelies in waist-out inks. When emptied, the bags will give the Greek people 247,000 yards of fabric for clothing and other uses.

It is estimated that the 500,000 bushels of wheat will yield 200,315 one hundred pound bags of flour that will require about 330 freight cars, or six complete trains, for transportation to the eastern seaboard. A 40 provided by the Greek War Relief Association (U.S.A.) and the ECA will sail with the flour from Boston to Salonika about April 5.

It is unlikely that any Red Cross funds will be required in sending this shipment of flour to Greece. The government of Canada has provided the wheat; free ocean transport is settled; and the sale of the milling by-products such as wheat germ, bran, shorts, middlings and screenings will offset the cost of milling, bags, enrichment, inland freight and insurance.

On arrival in Greece, the flour will be distributed by the Greek Red Cross in collaboration with the Canadian Ambassador in Athens, the Hon. G. L. Magann.

WHAT WILL YOUR GARDEN GROW

Those who rely entirely on outdoor seeding are depriving themselves of many tasty vegetables and attractive flowers, says P. D. McCalla, supervisor of horticulture, Alberta Department of Agriculture. Many long-season plants can be started indoors to provide healthy, well-grown specimens for outside planting as soon as the season permits. Among the more common vegetables that can be started in this way are cabbage, cauliflower, tomatoes, cucumber, squash and melons.

No special equipment and only a small amount of care is required. Shallow boxes or plant pots may be used, and with good soil, regular watering and adequate light, much useful material can be grown. A sunny room or basement window provides a suitable location. The soil mixture can be made of two parts of good garden soil to one part of sand. Sow the seeds in moist soil and cover with newspaper to encourage rapid germination. Further water is not usually needed until the seeds have germinated, following which the paper should be removed and the soil kept moist as required. On the appearance of the first true leaves, usually in about two weeks time, transplanting and spacing in flats will result in well developed plants by the time the outdoor planting season arrives. A useful bulletin, "Home Vegetable Growing," is available from the Extension Service, Alberta Department of Agriculture, Edmonton. Starting plants, transplanting, location, fertilizer, cultural practices and how and what to plant are all mentioned therein.

MORE POWER TO THE

Farmer

When you keep up with agricultural progress your farm operation becomes a good-paying business. That's where The Commerce can help you. Your Commerce Manager represents a Bank that has for many years taken a keen interest in promoting better farming and in looking after Canadian farmers' banking needs. Why not pay him a visit?

Be sure to ask for your copies of these booklets. They are available at any Commerce branch.

"More Power to You" explains farm mechanization in keeping with good business practice.

"Keeping the Farm in the Family" shows how a farm can be run as a profit-sharing partnership.

"Features on the Production Line" deals with grazing control and soil conservation necessary for better land use.

"Good Breeding Shows" outlines the combination of factors which help you to realize top production.

"Quality Makes Sales" tells how to get quality with volumes at an economical production cost.

A FORTUNE IN IT

If you could place an ad in the Moon millions of people would read it. Even then it would only be valuable a few nights each month, whereas a Want Ad in the paper while more limited in its scope will cover this particular locality every day in the year.

CLASSIFIED ADS

FOR SALE—3-burner coal oil stove with even. Stove pipes. Apply Box 255, Gleichen

BULLS FOR SALE—Six coming year old bulls. These bulls are bred from a Bow Valley Mixer. These are priced to sell. Apply Mrs. Chas. Oldenburg, Bassano, Alta.

SEED OATS FOR SALE Victory Seed Oats with a germination test of 98% and weighing 40 lbs. per measured bushel. First come BEST served. ROY SMITH, BASSANO, BOX 125
